#### Dear Colleagues:

It gives me great pleasure to invite you to participate in the 2nd Annual Colorectal Surgery Forum. This forum is scheduled to take place on November 5-6, 2011 at China Medical University Hospital, Taichung, Taiwan. This forum will focus on the standardization and trends of colorectal surgery, current concepts in anorectal surgery, and other topics regarding the future of colorectal surgery. Similar to last year, we hope to present cutting-edge, complex, and even controversial topics in the field of colorectal surgery, catering to the diverse interests of our attendees which include superb faculty from China, France, Hong Kong, Japan, Korea, Philippine, Singapore, and Taiwan. Topics such as NOTES, robotics, TEM, TME, robotic colorectal surgery, and advanced

laparoscopy will be highlighted throughout the meeting. Hopefully, this forum will not only bring all these developments to light, but also serve as a platform for us to discuss the current status of colorectal surgery in these challenging areas.

For those that have not visited our city, Taichung is a beautiful city located in the central part of Taiwan. It is blessed with temperate weather (yearly average temperature of 22.8 degrees- Celsius), making all the seasons reminiscent of spring. It is a city that boasts abundant natural resources and supports a population of more than 2 million people. The people of Taichung are full of culture and welcome international visitors, making it a great city for tourism. Along with the hospitality, Taichung is surrounded by vast mountains and rivers that offer once-in-a-lifetime experiences for sightseeing!

On behalf of the President of the China Medical University System, Chang-Hai Tsai, China Medical University Hospital, and the rest of the organizing committee, I extend my warmest welcome to everyone who will be participating in the Colorectal Surgery Forum 2011 in Taichung. I look forward seeing you in November!

William Tzu-Liang Chen, M.D. Forum Director
